

# NATURE IN YOUR NEIGHBORHOOD EXPLORER GUIDE

## EPISODE 5: Natural Sense-ations

### SOUND MAPPING:

In the space below, draw yourself, or write your name, in the center. Then, find a place outside to sit quietly for 5-10 minutes. Close your eyes and concentrate on the sounds around you. Record the sounds using drawings or words on your map. Remember to record the sounds on your page in relation to where you hear them.

A large, empty rectangular box with a dark teal border, intended for the user to draw themselves or write their name in the center and record sounds around them.

## TEXTURE COLLAGE:

In the space below, use crayons to transfer textures from nature onto your page. This often works best when using the crayons unwrapped and on their side. Use as many colors and textures as you'd like! Remember, be gentle with living plants, like flowers or leaves, that may be fragile.
