

Cottonwood Creek Greenbelt

This ecosystem features off-channel ponds, Blackland Prairie, and wetlands and sits in a floodplain that includes a floodway. We intend to preserve the park naturally, mowing about four to six feet on either side of the trail.

Bridging yesterday to tomorrow

Constructed in 1904, the Ganzer Road Bridge at Milam Creek spans 25 feet and once provided service to I-35 in Denton County. Built in 1910, the Tom Cole Road Bridge at Hickory Creek was on a feeder road to FM 156. Both historic iron bridges were awarded by Denton County to Frisco and relocated to Cottonwood Creek Greenbelt in 2015.
