

NORTHERN CORRIDOR ROADWAY PROJECTS

The City of Frisco is investing more than **\$201 million** (\$201,987,000) on 10 major roadway construction and/or improvement projects throughout the city's northern corridor. Construction on five of the roadway projects is underway, including reconstruction of more than 18 miles of the Dallas North Tollway (DNT) main lanes through Frisco. The North Texas Tollway Authority (NTTA) started reconstructing the DNT lanes in August 2022. All 10 of the roadway projects throughout Fields, a 2,500-acre master-planned development, are expected to be complete by the third quarter (Q) of 2025. When complete, the City of Frisco's \$201-million investment will have provided 65 miles in roadway construction improvements.
